## Experience

### Microsoft Analytics Lead (Power BI Consultant)

IBM

Dec 2020 - Present (1 year 2 months +)

Lead team of Data Analysts deployed to different projects to monitor the current status of their projects and workloads.

Interview newly hired Power BI specialist to be deployed in a project within IBM, PMI Account.

Also deployed in a project containing Data Scientists, Data Engineers, and Data Architects to support companies' innovation projects and enhancement through data science and analytics.

Create insightful dashboards and reports to be used for company-wide analysis and forecasting. Use snowflake, Hadoop, SQL Server, Jupyter as data sources for the data dashboard.

Provide analysis with the data before it will be used in power bi dashboard.
